9. **GUEST PRESENTATION BY JENNIFER BOARDMAN, ODOT**
   Jennifer gave a presentation on the role and responsibilities of the Board of Directors.
   
   a. **Policy Making**
      A governing board is a policymaking body, a type of organization within your transportation agency which is a formally constituted group of people working within a structure and process to accomplish a particular mission, that is, to govern.

   b. **System Innovation**
      The board’s role is to lead in deciding what the organization should be, where it is headed, and what it should become in the near term and the long run.

   c. **Oversight of the system’s performance and legal and fiduciary responsibilities**
      The board will need to know the enabling legislation and bylaws as well as the laws, rules, regulations, and standards that apply to the organization.
The board will then determine how well the organization is performing by comparing the outcomes with original goals.

i. Take regular tours of the transit system and interviews with staff members—especially after changes to the staff or system.

ii. Review mission, responsibilities, performance targets, website, budget, policies and procedures including the safety management system.

d. Customer and Citizen Representation
Often, riders depend on public transit staff and the board to champion their rights and best interests. The board builds the public image and system value for everyone; they are advancing public understanding and support for the agency, and system-wide growth.

e. Board Development
Access ODOT, Oregon and National Associations, and their conferences

f. Evaluate the General Manager
